The Clarkeville Art and Flowers Project represents a development for Stewarts. This shop, once a major focal point for the village of Palmerstown has for many years lain derelict, a victim of the drive for suburban development and the growth of large retail centres.

In common with the Coach House building, this Clarkeville premises has survived the passage of time. Arising from a partnership between South Dublin County Council and Stewarts Foundation, it has now been restored to a place of importance in the village streetscape, contributing to the quality of life of all who live, work or visit the village of Palmerstown.

Clarkeville Art and Flowers provides a new shop window for the talent of our artists, for community art groups and for visiting art exhibitions.

Working with our in-house experts from the Grounds Department, Clarkeville offers exquisite and exotic flowers presented with all the style and panache for which our Coach House has already become renowned
